COVID-19 Bivalent Vaccines

Everyone aged 12 and older is recommended to get a COVID-19 bivalent booster vaccine. They have been developed to target 2 strains of COVID-19, including omicron, and provide the broadest protection available. The bivalent vaccines have been proven to be safe and effective, reducing severe symptoms of COVID-19, and reduce the chance of severe symptoms, hospitalization and even death.

Note: In order to receive a bivalent booster dose, you must have received the primary vaccination series (usually two doses).

Bivalent vaccines are available at:

- Doctors' offices
- Medical clinics
- Pharmacies
- Vaccine clinics
- Indigenous vaccine clinics

Did You Know? You can get your COVID and flu vaccines at the same time.

Visit **ProtectMB.ca** and use the vaccine finder map to find a COVID-19 bivalent dose near you.

Book your appointment today at **ProtectMB.ca**
or by calling **1-844-MAN-VACC** (1-844-626-8222).
